SERVICE FLYER | PRACTICAL TEST

Test in real conditions. Improve with purpose.

The Physical Penetration Test examines, under realistic and clearly defined conditions, whether an unauthorised person could gain access to a site, building or particularly sensitive area.

01 Controlled test

Protection measures and processes are assessed using scenarios authorised in writing.

02 Evidence

Penetration opportunities are documented and assessed by risk and business impact.

03 Improvements

The confidential report turns observations into practical, prioritised measures.

FOR SENSITIVE AREAS AND SITES WITH HEIGHTENED PROTECTION NEEDS

PHYSICAL PENETRATION TEST | ASSESS | PRIORITISE | PROTECT

CONTROLLED PRACTICAL TEST

Test in real conditions. Improve with purpose.

The test examines whether physical security measures and operational processes hold up under controlled conditions. Every engagement is based on written authorisation, a clear scope and binding stop criteria.

SUITABLE FOR

- Sites with sensitive areas
- Businesses with multiple access routes
- Organisations with existing security measures
- Operations with heightened protection needs

WHAT YOU RECEIVE

Controlled test	Protection measures and processes tested using scenarios authorised in writing.
Clear evidence	Penetration opportunities documented by risk and business impact.
Improvement plan	Practical measures prioritised and explained in a structured debriefing.

Possible test areas

- Site boundaries, entrances and secondary access points
- Reception, visitor and delivery processes
- Doors, gates and access control
- Badges, keys and permissions
- Access to sensitive operational areas
- Social engineering after explicit approval

Process

01 Authorise
Agree objectives, scope, rules and exclusions in writing.

02 Test
Assess approved scenarios discreetly and under control.

03 Evaluate
Assess evidence, risks and potential impacts clearly.

04 Debrief
Review the report, measures and next steps confidentially.

HOW RESILIENT IS YOUR SITE IN PRACTICE?

A short description of the site is enough for an initial assessment. Together, we define tests that are meaningful, proportionate and safe.

Only with written authorisation, a clear scope and no property damage.
