SSA
SANTOS SECURITY ADVISORY
ASSESS · PRIORITISE · PROTECT

SERVICE FLYER | IN-DEPTH

Complex sites. Clear view of risk. Sound decisions.

The Site Security Audit connects assets, realistic incident scenarios and the effectiveness of existing controls to create a clear basis for decisions.

01 Context

Assets, threats, processes and controls are assessed as one connected picture.

02 Risk register

Scenarios, impacts and existing controls are documented in a structured format.

03 Roadmap

Measures are ranked by risk, effectiveness, dependencies and feasibility.

FOR SMES, INDUSTRY, PRODUCTION, LOGISTICS AND WAREHOUSING

IN-DEPTH PHYSICAL SECURITY ASSESSMENT

In-depth analysis. Clear management insight.

The Site Security Audit creates a robust overall picture by connecting assets, realistic scenarios and existing controls. This makes the material risks and the measures with the greatest priority effect clearly visible.

SUITABLE FOR

- SMEs and commercial sites
- Industry and production
- Logistics and warehousing
- Sites with multiple security zones

WHAT YOU RECEIVE

Comprehensive review	Structural, technical and organisational controls assessed against the protection need.
Risk register	Risks, scenarios, impacts and existing controls documented in a structured format.
Management roadmap	Measures prioritised by urgency, effectiveness, dependencies and feasibility.

Typical review areas

- **Perimeter, buildings and security zones**
- **Access, visitors and external companies**
- **Key and permission management**
- **Goods receipt, warehousing and protected assets**
- **Video surveillance, intrusion protection and alarms**
- **Emergency organisation and incident response**

Process

01 Scope
Define objectives, assets and the required review depth.

02 Prepare
Review existing information and relevant incidents.

03 Audit on site
Assess controls, interfaces and processes systematically.

04 Roadmap
Document findings and explain them for decision-making.

DEFINE THE RIGHT AUDIT SCOPE

A short description of the site is enough for an initial assessment. The objective and required depth are then clarified together.

Vendor-neutral, risk-based and focused on implementation.
